

Supplement Facts		
Serving Size: 3 Capsules		
Servings Per Container: 30		
	Amount Per Serving	%Daily Value
<b>Downstream Detox Blend</b>	1.25 g	+
Organic Terminalia bellirica Fruit Extract, Organic Fermented Milk Thistle Seed, Organic Beet Root, Organic Fermented Orange Peel, Organic Fermented Lemon Peel, Organic Fermented Juniper Berry, Organic Fermented Bearberry Leaf, Organic Fermented Dandelion Root, Organic Fermented Burdock Root, Organic Fermented Bupleurum Root		
<b>Grassfed Glandular Blend</b>	400 mg	+
Bovine Liver, Bovine Kidney, Bovine Lymph		
<b>Cellular Communication Complex (C3)</b>	200 mg	+
Organic Reishi Mushroom Mycelium, Organic Myceliated Turmeric Root, Organic Myceliated Milk Thistle Seed, Organic Myceliated Ginger Root		
<b>Systemic Enzyme Blend</b>	100 mg	+
Cellulase, Amylase, Aylanase, Lipase, Phytase, Pectinase, Protease, Lactase, Hemocellulase, Invertase		
+ Daily Value not established		
<b>Other Ingredients:</b> Humulus lupulus, Zizania, Panax ginseng, Curcuma longa		

## SUGGESTED USE

- ✓ Adults take 3 capsules per day, together or in divided doses. May be taken with or without food, or as directed by your healthcare professional.

## CONTRAINDICATIONS

- ✗ If you are taking blood thinners, consult your doctor. For any medication-related ingredient contraindications, always consult your doctor.

The statements regarding this supplement have not been evaluated by the Food and Drug Administration (FDA). This product is not intended to diagnose, treat, cure, or prevent any disease. Consult with a healthcare professional before starting any dietary supplement regimen. Keep out of reach of children. Do not exceed the recommended dosage. If you are pregnant, nursing, taking medication, or have a medical condition, consult your physician before using this product.

# DRAINAGE ENHANCER

Discover the groundbreaking formula that combines support for your liver, kidneys, and lymphatic system, all in one powerful product. Unlike anything else on the market, our Drainage Enhancer synergistically targets the main downstream detox pathways, providing comprehensive support for your body's natural detoxification processes.

## WHAT MAKES THIS PRODUCT UNIQUE?

We've carefully selected a blend of organic herbs and botanicals with a rich history of supporting critical pathways.

What sets us apart is our commitment to maximizing bioavailability. Many of these botanicals undergo fermentation to enhance gut absorption, a crucial advantage for those with inflamed or leaky gut conditions.

To precisely target these herbs and botanicals to their respective organs and glands, our formula includes American grass-fed, grass-finished bovine liver, kidney, and lymph. These glands contain the essential code for rejuvenating the systems they originate from, making them the optimal source of nutrition for these vital organs.

In a groundbreaking move, we've incorporated enzymes into this detox support product. These enzymes act as cleansers by dissolving circulating toxin compounds, revolutionizing detoxification and minimizing unwanted symptoms.

Furthermore, thanks to our unique enzyme formulation and the carefully selected herbs, our product can effectively support individuals dealing with gout. It acts as an acid cleanser while breaking down crystals in circulation, particularly when taken at a higher dose.

## PURPOSE OF C3

The C3 Complex stands as a distinctive element within the Cellular Solutions line, playing a pivotal role in supporting cellular communication and enhancing the bioavailability of essential ingredients. We choose a specific mushroom with the ability to target a specific cell and then we grow the mushroom on specific substrates (like turmeric, ginger, licorice, etc) so that the mushroom biodegrades the substrate and incorporates the active ingredients and their function. This process, referred to as myceliation, makes the active ingredients in the substrate that drive a specific function more bioavailable and usable in the human body and amplifies the effect of the substrate.

We've chosen Reishi for its remarkable ability to target critical organ systems involved in detoxification and its capacity to modulate the "inflammatory immune response," which is often responsible for the adverse effects associated with detoxification.

Our Reishi is cultivated on milk thistle to amplify milk thistle's protective effects against toxicity, inflammation, oxidation, and stress. Additionally, it enhances the active ingredients in milk thistle, which play a pivotal role in liver and kidney cell detoxification.

Furthermore, Reishi is cultivated on ginger and turmeric to support and regulate the inflammatory processes commonly encountered during detoxification.

## KEY INFORMATION ABOUT UNIQUE INGREDIENTS

- **Terminalia bellirica** is one of 3 fruits in the famed ayurvedic triphala, which is the #1 bowel conditioner in India and the Middle East. It has also been shown to help detox the body of stored acids. Clinically studied to remove concentrated acid crystals, especially uric acid and oxalic acid. Helps with gouty arthritis or acid in the joints. Bellirica decreases demineralization.
- **Organic beetroot** is chosen for the liver and kidneys.
- **Fermented citrus peels** are for lymphatic drainage.
- **Fermented juniper berries and fermented bearberry** are renowned kidney and urinary tract cleansers.
- **Fermented dandelion root** is for the liver, kidneys, and lymph.
- **Bupleurum root** is known for its support of the liver; however, it is also used for respiratory infections, flu, common cold, pneumonia, diarrhea, constipation, and digestive problems, most likely for its ability to open detox pathways.
- **Enzyme blend** breaks down small materials that stop up the detox systems.
- **Cellulase:** An enzyme that breaks down difficult-to-digest compounds such as cellulose. Cellulose is a major problem which drives systemic inflammation when it is not broken down. Cellulose can be just as bad as undigested gluten, casein or lactose, when not metabolized properly.
- **Reishi** grown on milk thistle can support the stimulation of liver dump.
- **Reishi** supports adrenals and kidneys, which are critical to stress adaptation during detox.
- **Bitters** support kidney and lymph and help dump bile from the liver.
