

GUT ENHANCER

Prepare to experience a gut product like no other on the market. Our Gut Enhancer is an extraordinary blend that addresses the critical missing elements in both the soil and, consequently, the human gut. The depletion of soil due to excessive farming practices involving pesticides, herbicides, and synthetic fertilizers has led to the absence of vital bacterial organisms and natural mineral humic compounds.

WHAT MAKES THIS PRODUCT UNIQUE?

Our product combines these essential ingredients in a unique way, restoring harmony to your microbiome. It not only encourages communication among your gut bacteria but also fortifies your defenses against unwelcome pathogens.

The distinctive combination of ingredients promotes healthy gut motility without resorting to stimulants like magnesium or herbal irritants. Instead, it gently conditions the colon to facilitate waste elimination. Additionally, it targets bacteria in the small intestine, which may temporarily cause diarrhea in some individuals. Trust in the body's innate intelligence. Often, those who experience these initial reactions are the ones who need it most. This approach supports genuine cellular and comprehensive intestinal detoxification.

This product is a versatile solution addressing the three primary contributors to gut issues: leaky gut, gut inflammation, and pathogenic biofilms. It stands out as a top-tier solution for Small Intestine Bacterial Overgrowth (SIBO).

PURPOSE OF C3

The C3 Complex stands as a distinctive element within the Cellular Solutions line, playing a pivotal role in supporting cellular communication and enhancing the bioavailability of essential ingredients. We choose a specific mushroom with the ability to target a specific cell and then we grow the mushroom on specific substrates (like turmeric, ginger, licorice, etc) so that the mushroom biodegrades the substrate and incorporates the active ingredients and their function. This process, referred to as myceliation, makes the active ingredients in the substrate that drive a specific function more bioavailable and usable in the human body and amplifies the effect of the substrate.

Our choice of Lion's Mane is deliberate because of its unique ability to target brain cell receptors. The gut, often referred to as the "second brain," shares similar receptors with our primary brain. Lion's Mane's capacity to target these specific receptors and deliver active ingredients to gut cells is a key element of our formula's success.

The substrates ginger, licorice, and peppermint are carefully selected for their ability to reduce inflammation in the mucosal lining of the gut. This support for faulty tight junctions, which can lead to leaky gut, hinges on downregulating inflammation. Our formula's precise targeting of this purpose to specific cells sets it apart as an unparalleled solution.

Supplement Facts		
Serving Size: 3 Capsules Servings Per Container: 30		
	Amount Per Serving	%Daily Value
Magnesium*	100 mg	24%
Zinc*	10 mg	91%
Soil Based Probiotic Mineral Blend	900 mg	+
<small>Saccharomyces boulardii (10 Billion CFU*), Humic Soil Extract (Organic Acid Mineral Complex), Bacillus subtilis (10 Billion CFU*)</small>		
Cellular Communication Complex (C3)	550 mg	+
<small>Organic Lion's Mane (Hericum erinaceus) Mushroom Mycelium, Organic Myceliated Ginger Root, Organic Myceliated Licorice Root, Organic Myceliated Peppermint Leaf</small>		
+ Daily Value not established		
Other Ingredients: Hypromellose, organic <i>Copaxima cerifera</i> wax		
*At time of manufacture		
*Hydrolyzed Whole Protein Chelate		

SUGGESTED USE

- ✓ Adults take 3 capsules per day. Best taken on an empty stomach, or as directed by your healthcare professional.

ADDITIONAL USES: For advanced gut symptoms, could take 2 doses daily. Or could take 2 at bedtime, 2 during the night, and 2 in the morning.

CONTRAINDICATIONS

- ✗ Always check with your doctor for ingredient contraindications if you're on any medications.

The statements regarding this supplement have not been evaluated by the Food and Drug Administration (FDA). This product is not intended to diagnose, treat, cure, or prevent any disease. Consult with a healthcare professional before starting any dietary supplement regimen. Keep out of reach of children. Do not exceed the recommended dosage. If you are pregnant, nursing, taking medication, or have a medical condition, consult your physician before using this product.

KEY INFORMATION ABOUT UNIQUE INGREDIENTS

- **Lion's mane** also contains a nerve growth factor which regenerates neurons and controls H. pylori infection.
- **Hydrolyzed whole protein chelate forms of magnesium and zinc** support gut cellular integrity (seal the gut). They also optimize reproductive hormones.
- **Minerals** from a humic soil extract which is a fuel for soil based probiotic organisms (SBOs) They are broken down byproducts of thousands of years of decomposing organic matter high in humic and fulvic acid chelating the bad stuff and improving bioavailability of the good stuff.
- **Saccharomyces boulardii (10 billion CFUs):** Yeast against yeast produces lactic acid which kills yeast.

Great for candida, vaginal thrush, etc. They are also known to break down biofilm.

- Triggers gut to break down carbs and immunoglobulins to support gut against invaders.
- Has been shown to produce lactic acid that destroys yeast and creates an environment in the gut to encourage good bugs.
- Has also been shown to act as immune support and gut sealer.
- Eat hydrocarbons and undigested plant material which can cover up microvilli, interfering with gut assimilation.

- **Bacillus subtilis** - ancient probiotic. Bacillus subtilis acts like a packman and the humic chelates the bad stuff. So much stuff gets into your colon but peristalsis typically isn't working, so the stuff builds up and it slows down. Eventually the probiotics will remedy healthy colon activity.

- **Licorice** supports the gut mucosal lining as well as supports normal H. pylori population.

- **Peppermint** is gas reducing and also reduces IBS.

- **Soil based probiotic mineral blend.** Contains magnesium and zinc (both most important for gut lining integrity), and hydrolyzed whole protein chelate to repair the gut.

- **Carbon based humic soil** heals the gut lining and closes tight junctions, breaks down carbohydrates, and fends off pathogens.
